Education

Degree/Certificate	Institute/Board	CGPA/Percentage	Year
B.Tech., CSE	National Institute of Technology, Patna	9.07	Jun 2026
Senior Secondary	Lord Buddha Public School	93%	Mar 2022
Secondary	D.A.V. Public School	97%	Mar 2020

Experience

- **IIT Ropar** [] — *May 2025 – Jul 2025*
  Summer Research Intern – DLED Labs — Punjab, India
  - Developed a scalable learning path module for CAL, supporting 10,000+ concurrent users system-wide.
  - Built a modular MERN system with dynamic routing and progress tracking, enabling adaptive learning.
  - Analyzed learner mastery via rule-based and schema-driven logic, improving retention by 25–30%.
  - Presented system design in DLED review sessions, receiving approval for pilot deployment and research use.
- **NIT Patna** [] — *Jan 2025 - Apr 2025*
  UG Researcher, Minor Project under Prof. Akshay Deepak — Patna, India
  - Investigated detection of AI-generated vs. human-written Hindi texts by fine-tuning sparse-attention-based LongFormer on a 10,000+ sample dataset in a morphologically rich, low-resource setting.
  - Leveraged MAGE for contextual feature extraction, improving classification robustness in Hindi NLP.

Projects

- **Face Recognition System: Advanced face recognition model** — *Dec 2024*
  Tools: Python, TensorFlow, OpenCV, Scikit-learn, Albumentations, VGG16 []
  - Developed an advanced face recognition model using deep learning and OpenCV for identity verification.
  - Achieved 98% face-matching accuracy using feature extraction techniques.
  - Created a VGG16-based dual-output model for face classification and bounding box detection, enhancing both recognition accuracy and localization.
  - Applied Albumentations for image augmentation, enhancing model robustness with flipping, rotation, and color adjustments.
- **Jarvis AI Assistant: Voice-activated AI assistant** — *Aug 2024*
  Tools: Python, OpenAI GPT, SpeechRecognition, SQL, gTTS, pyttsx3, OpenCV, HTML, CSS, JS []
  - Developed a voice-activated AI assistant capable of performing tasks like web browsing, opening applications, playing music, fetching news, and responding to queries.
  - Integrated speech recognition and text-to-speech capabilities, enhancing user interaction.
  - Created a dynamic AI-driven assistant with real-time voice command execution, an interactive GUI, and multimodal input handling using OpenCV and eel.
  - Applied OpenAI GPT for NLP, enhancing responses and task automation.

Additional Projects

- *Masterly, Comment Toxicity Predictor, Duplicate Question Pair Detector, Image Classifier, Movies Recommender*

Skills

- **Programming Languages**: Java, Python, C
- **Technologies**: DSA, ML, DL, NLP, Computer Vision, Recommender Systems, SQL
- **Tools**: TensorFlow, Keras, Scikit-learn, OpenCV, NLTK, SpaCy, Transformers, Albumentations, CI/CD, XGBoost, NumPy, Pandas, Matplotlib, Surprise, BeautifulSoup, AWS, Streamlit, LLM APIs, MongoDB

Certifications

- **Coursera & Stanford**, Machine Learning Specialization — *Feb 2025*
- **ISRO**, Space Science & Technology Awareness Training — *Sep 2023*

Achievements

- Solved 500+ DSA problems across LeetCode and GFG, showcasing strong problem-solving skills.
- Bronze Medalist - International Mathematics Olympiad in High School.
